Executive Insight & Trust

Engine Version	Active Tier	Models Attempted	Models Succeeded
v2.0.0	enterprise	19	19

Forecast Confidence

Confidence Score (0–100)	Primary Ensemble MASE	M-Competition Tier
40	—	Ensemble

Why this matters: Confidence is derived from MASE vs the M-Competition Elite Tier benchmark — not just internal model agreement. Elite tier means the engine outperforms professional forecasting software baselines.

Model Certification Summary

Elite	Strong	Pass	Fail
0	0	0	0

Behavioral Regime

Current Regime: **Volatile / Uncertain**

Risk Flags

Confidence score below 50 — model agreement is low.

Low confidence in inferred data frequency.

Prophet flagged (MASE ≥ 1.00 on regime-change data). Regime-detection filter active.
