Run Forecast

Forecast completed.

Forecast Results by Model

No model ranking is performed. Readiness tiers reflect certification eligibility and backtest strength only.

Certification requires a minimum of 36 observations. Below 36, models may still run, but readiness is marked Ineligible.

Primary Ensemble | Not Assessed

Decision Readiness

Readiness Tier

Not Assessed

Certification requires a minimum of 36 observations. Below 36, models may still run, but readiness is marked Ineligible.

Executive Assessment

Summary: Primary Ensemble is assessed as **Low confidence** for decision use. This posture is based on observed accuracy, uncertainty calibration, and structural diagnostics.

Key Insights

- Forecast accuracy could not be reliably evaluated.
- No material systematic forecast bias detected.
- Confidence interval calibration is unavailable or inconclusive.

Use cautiously. Intended for exploratory analysis, stress-testing, or as a secondary reference only.
